All quoted prices include metal preparation, masking and coating.

Actual customer costs will be determined after material inspection and choice of coating.

Before shipping, all parts must be completely disassembled and free from dirt and grease. Do not include parts made of magnesium, pot metal, or containing non-metallic bushings or seals that cannot withstand 400 degrees F. Astral Products is not responsible for old parts that lack structural integrity due to age or condition prior to metal preparation. Media blasting can break or create holes in badly worn parts. Some cast parts experience outgassing. While we try to minimize the effect, we cannot be held responsible. The customer is responsible for all incoming and outgoing shipping charges or in-transit damages.

****We cannot accept parts with lead-based paint for blasting****
